1 Complete inventory of recreation resources, including historic, cultural and natural, at the Oroville Facilitie	X			XX	1	—
2 Review the current condition and adequacy of recreation facilities in the Project area, identifying maintenance issues as well as opportunities and constraints for new facility development, existing and new location			(X			
3 Identify current and projected recreation use and visitation (totals and patterns)	X	X	(X	
4 Identify operational and access constraints to the Oroville Facilities, particularly lake level dat		X)		Х		
*5 Identify swimming areas: existing, potential, demands, needs, complimentary facilities, constraint		X		ХХ		
*6 Identify trails: existing, potential, use, demands, needs, complimentary facilities, constraints, conflic		X			1	
7 Identify shoreline and property ownership and responsibility	Х		Х	Х	1	
8 Evaluate recreational and land use plans for consistency	Х			ХХ		
9 Evaluate ADA accessibility		X)		ХХ		
10 Compare use totals/patterns with other water based recreation facilities within California and determine key barriers to existing and future growth in recreation use of Oroville faciliti	Х					
11 Evaluate existing and potential public use impacts from recreation activities and facilitie		X)	(ХХ		
12 Regional Marketing plan	Х			X	X	
13 Butte County marketing plan.	Х			Х	Х	
14 DWR Recreational marketing plan.	Х			Х	Х	
15 Input from residents.	Х			X		
16 Input from businesses.	Х			X		
17 Input from Butte County.	Х			Х		
18 Input from City of Oroville	Х			X		
19 Input from Paradise	Х			Х		
20 Input from City of Chicc	Х			X		
21 Identify areas where facilities are complementary to each other	Х	X)		ХХ		
22 Identify demand, needs and preferences for users of various recreation opportunities	Х			ХХ		
23 Identify all areas where debris has accumulated and prioritize clean-up efforts				Х		
24 Identify preferences of maintenance agencies for schedule and plan	Х			Х	1	
25 Identify operational and access constraints to the Oroville Facilities, particularly visitor data and CalTrans dat	Х			Х		
26 Identify suitable locations for new facilities, as well as areas of constrain	Х	X		Х		
*27 Identify existing access conditions, complimentary routes, user access demand, needs, preferences	Х			Х		
28 Evaluate existing and potential public use impacts from increasing access	Х			Х		
29 Identify level of assessment for biological inventory (DPR, DFG)	Х			Х		
30 Identify waterfowl data	Х			Х		
31 Identify alternative flora for invasive replants	Х			Х		
32 Determine present and future outdoor recreation and tourism demands and unmet needs in Northern California and Oroville's probable share	Х				X	
33 Study potential locations and methods to create warm water swimming facilities to serve users at use focal points on Oroville, the Forebay, Afterbay and the Lower Feather Riv	X	X	(
34 Study means of creating alternative boating use attractions at the Forebay and Afterbay during low water operations at Orovill	Х	X	(
35 Obtain information regarding existing budgets, operations and maintenance plans, responsibilities and schedules for the various components of the greater Oroville complex, including the wildlife area, Afterbay outlet fishing access, Afterbay, Fo	rebay	, dive	rsi X			
36 Develop a new operations and maintenance plan, including the need for satellite maintenance facilities, opportunities for contracting various aspects to private or agency partners and other means to create efficiencies and reduce costs while properties.	ovidin	ig ade	qu X			
37 Identify potential safety hazard areas and issues		X		X		
38 Identify areas where safety has been a problem		Х		Х		
39 Study alternative management mechanisms and combinations and provide recommendations to accomplish resource goals				Х		
40 Evaluate and identify potential opportunities for revenue generation, public-private partnerships and other reliable funding sources for recreation development, operation and maintenan				X	X	
41 Evaluate the opportunities and potential locations for a new multi agency visitor center and possible management structures to accomplish such a facili	X			X		
42 Assess the range of hunting and fishing, wildlife viewing and nature study opportunities that are currently provided in the project area, identify opportunities that are not provided, and identify facilities and management structures needed to according to the project area, identify opportunities that are not provided, and identify facilities and management structures needed to according to the project area, identify opportunities that are not provided, and identify facilities and management structures needed to according to the project area, identify opportunities that are not provided, and identify facilities and management structures needed to according to the project area, identify opportunities that are not provided, and identify facilities and management structures needed to according to the project area, identify opportunities that are not provided, and identify facilities and management structures needed to according to the project area, identify opportunities that are not provided and identify facilities and management structures needed to according to the project area, identify opportunities that are not provided and identify facilities and management structures needed to according to the project area.	X			XX		
43 Study user demographics and spending patterns					X	
44 Surveys of local businesses to determine purchasing and sales relationship					X	
45 Interviews with local government officials (cities, counties, townships, and special districts) to document procedures for collecting and distributing tax revenues affected by recreation activity at Lake Orov					X	
46 Conduct economic analysis to understand outdoor recreation demands, unmet needs, opportunities and growth potential for recreation related use in the project are					X	
47 Evaluate the economic return to the local economy from alternative recreation uses and related costs to provide for such uses in order to assist in developing a recreation plan that optimizes returns while meeting the needs of the put					Х	
48 Interviews with state and other officials to identify potential institutional and legal constraints and to assess needed actions for implementation	\Box				<u> </u>	X
49 Estimates of cost impacts to the Project of providing specific project benefits locally						X
